EXPLO Systems, Minden, LA: On December 14, 2012, EPA participated in a conference call with DCMA (Defense Contracts Management Administration); JMC (Joint Munitions Command); PEO (Product Executive Office); EPA Superfund, Enforcement, General Council and CID; ACC (Army Contracting Command); LSP (Louisiana State Police); and LDEQ to discuss the ongoing response actions at EXPLO Systems.

To date, 3,795,940 lbs of the improperly stored M6 Propellant (smokeless black powder) has been secured in magazines/bunkers at Camp Minden. Under the direction of LSP, EXPLO employees have, and continue to provide the workforce of the operation. Operations continue Monday-Friday and are shut down each weekend with LSP security on-site. No evacuations are continuing at this time.

All parties on the call offered technical expertise and support LSP's ongoing operations. PEO (DOD) will provide equipment to sample the M6 propellant for the determination of degradation of the product. The equipment and a technician to operate and/or train LSP staff on the equipment's operation will arrive early next week. **(Ragan Broyles x 3166)**
